This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of claims:

1.-2. (canceled)

mprising about

- (3. (new) A biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine comprising about 4,000 to about 150,000 N-acetylglucosamine monosaccharides covalently attached in a β -1 \rightarrow 4 conformation and having a molecular weight of about 800,000 daltons to about 30 million daltons.
- (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 3 having about 4,000 to about 15,000 N-acetylglucosamine monosaccharides covalently attached in a β -1 \rightarrow 4 conformation, and having a molecular weight of about 800,000 daltons to about 3 million daltons.
- 5. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 3 or 4 whose biocompatibility is determined by an elution test.
- 6. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 5 which has an elution test score of 0.
- 7. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 5 which has an elution test score of 1.
- 8. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 5 which has an elution test score of 2.
- 9. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 3 or 4 whose biocompatibility is determined by intramuscular implantation in rabbits.
- 10. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 3 or 4 whose biocompatibility is determined by intracutaneous injection in rabbits.
- 11. (new) The biocompatible poly- β -1-> 4-N-acetylglucosamine of claim 3 or 4 whose biocompatibility is determined by systemic injections in mice.
- (new) A biocompatible poly-β-1→ 4-N-acetylglucosamine comprising about
 4,000 to about 150,000 N-acetylglucosamine monosaccharides covalently attached in

NY2: 1444030.2

5

- a β -1 \rightarrow 4 conformation and having a molecular weight of about 800,000 daltons to about 30 million daltons in at least one N-acetylglucosamine monosaccharide has been deacetylated.
- 13. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 12 having about 4,000 to about 15,000 N-acetylglucosamine monosaccharides covalently attached in a β -1 \rightarrow 4 conformation, and having a molecular weight of about 800,000 daltons to about 3 million daltons in which at least one N-acetylglucosamine monosaccharide has been deacetylated.
- 14. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 12 wherein at least about 25% to about 75% of the N-acetylglucosamine monosaccharides have been deacetylated.
- 15. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 13 wherein at least about 25% to about 75% of the N-acetylglucosamine monosaccharides have been deacetylated.
- 16. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine derivative of claim 12 wherein at least about 70% of the N-acetylglucosamine monosaccharides have been deacetylated.
- 17. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine derivative of claim 13 wherein at least about 70% of the N-acetylglucosamine monosaccharides have been deacetylated.
- 18. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of any one of claims 12-17 whose biocompatibility is determined by an elution test.
- 19. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 18 which has an elution test score of 0.
- 20. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 18 which has an elution test score of 1

- 21. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of claim 18 which has an elution test score of 2.
- 22. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of any one of claims 12-17 whose biocompatibility is determined by intramuscular implantation in rabbits.
- 23. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of any one of claims 12-17 whose biocompatibility is determined by intracutaneous injection in rabbits.
- 24. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of any one of claims 12-17 whose biocompatibility is determined by systemic injections in mice.
- 25. (new) The biocompatible poly- β -1 \rightarrow 4-N-acetylglucosamine of any one of claims 12-17 which is immunoneutral.
- 26. (new) A biocompatible poly- β -1 \rightarrow 4-glucosamine comprising about 4,000 to about 150,000 glucosamine monosaccharides covalently attached in a β -1 \rightarrow 4 conformation, and having a molecular weight of about 640,000 daltons to about 24 million daltons.
- (new) The biocompatible poly- β -1-> 4-glucosamine of claim 26 having about 4,000 to about 15,000 glucosamine monosaccharides covalently attached in a β -1-> 4 conformation, and having a molecular weight of about 640,000 daltons to about 2.4 million daltons.
- (new) A biocompatible poly- β -1 \rightarrow 4-glucosamine comprising about 4,000 to about 150,000 glucosamine monosaccharides covalently attached in a β -1 \rightarrow 4 conformation, wherein at least one glucosamine monosaccharide has been acetylated.
- 29. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of claim 28 wherein at least about 25% to about 75% of the glucosamine monosaccharides have been acetylated.

- 30. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of claim 28 wherein at least about 30% of the glucosamine monosaccharides have been acetylated.
- 31. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of any one of claims 26-30 whose biocompatibility is determined by an elution test.
- 32. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of claim 31 which has an elution test score of 0.
- 33. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of claim 31 which has an elution test score of 1.
- 34. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of claim 31 which has an elution test score of 2.
- 35. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of any one of claims 26-30 whose biocompatibility is determined by intramuscular implantation in rabbits.
- 36. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of any one of claims 26-30 whose biocompatibility is determined by intracutaneous injection in rabbits.
- 37. (new) The biocompatible poly- β -1 \rightarrow 4-glucosamine of any one of claims 26-30 whose biocompatibility is determined by systemic injections in mice.

WHAT IS CLAIMED IS:

- A method for immunoisolation of a cell comprising: coating a cell/poly-β-1-4-N-acetylglucosamine species, said cell/poly-β-1-4-N-acetylglucosamine species comprising a poly-β-1-4-N-acetylglucosamine species comprising about 4,000 to about 150,000 N-acetylglucosamine monosaccharides covalently attached in a β-1-4 conformation, free of protein, substantially free of other organic contaminants, substantially free of inorganic contaminants, and having a molecular weight of about 800,000 daltons to about 30 million daltons within with at least one cell is encapsulated, with a coating having a polyelectrolyte charge opposite to the charge of the cell/poly-β-1-4-N-acetylglucosamine species, so that the cell within the cell/poly-β-1-4-N-acetylglucosamine
 species is immunoisolated.
 - 2. The method of claim 1, wherein at least one acetylglucosamine monosaccharide of the poly- β -1-4-N-acetylglucosamine species as been deacetylated.

REMARKS

The specification has been amended so that the title more accurately reflects the claimed subject matter.

Claims 1 and 2 have been canceled without prejudice. New claims 3-37 have been added to more particularly point out and distinctly claim that which Applicants regard as the invention. Support for claims 3-37 can be found in the specification, inter alia, at page 3, lines 8-14, page 24, lines 33-36, page 25, lines 14-29, page 42, line 34, and in Section 10, at pages 71-89. No new matter is added.

After entry of the amendments made herein, claims 3-37 will be pending in the present application.

CONCLUSION

Applicants respectfully request entry and consideration of the foregoing amendments and remarks.

Respectfully submitted,

PENNIE & EDMONDS LLP

1155 Avenue of the Americas New York, New York 10036-2711
